The Marblehead was developed by Roy L. Clough of the Marblehead Model Yacht Club in Marblehead, Massachusetts, USA, and was given international status by the predecessor of the ISAF–RSD in 1937.

**Introduction**

Marblehead hulls, hull appendages, rigs and sails may be manufactured by any amateur or professional manufacturer without any requirement for a manufacturing license.

The rules in Part II and III are open class rules which means that anything not specifically prohibited is permitted.

Owners and crews should be aware that compliance with rules in Section C is NOT checked as part of the certification process.

Rules regulating the use of equipment during a race are contained in Section C of these class rules, Part I of the ERS and in the Racing Rules of Sailing.

This introduction provides an informal background only and the International Marblehead Class Rules proper begin on the next page.
PART I – ADMINISTRATION

Section A – General

A.1 LANGUAGE

A.1.1 The official language of the class is English and in case of dispute over translation the English text shall prevail.

A.1.2 The word “shall” is mandatory and the word “may” is permissive.

A.2 ABBREVIATIONS

A.2.1 ISAF International Sailing Federation
ISAF–RSD ISAF – Radio Sailing Division
MNA ISAF Member National Authority
DM ISAF–RSD Member
ICA International Class Association
NCA National Class Association
ERS Equipment Rules of Sailing
RRS Racing Rules of Sailing

A.3 AUTHORITIES AND RESPONSIBILITIES

A.3.1 Where one does not exist, the functions of the ICA, as specified in these class rules, shall be carried out by the ISAF–RSD.

A.3.2 The international authority of the class is the ISAF–RSD which shall co-operate with the ICA in all matters concerning these class rules.

A.3.3 No legal responsibility with respect to these class rules, or accuracy of measurement, rests with:
- the ISAF
- the ISAF–RSD
- the MNA
- the DM
- the ICA
- any NCA
- the certification authority
- an official measurer

No claim arising from these class rules can be entertained.

A.3.4 Notwithstanding anything contained herein, the certification authority has the authority to withdraw a certificate and shall do so on the request of the ISAF–RSD.
A.4 ADMINISTRATION OF THE CLASS
A.4.1 The ISAF–RSD has delegated its administrative functions of the class to DMs. A DM may delegate part or all of its functions, as stated in these class rules, to an NCA.
A.4.2 In countries where there is no DM, or the DM does not wish to administer the class, its administrative functions as stated in these class rules shall be carried out by the ICA which may delegate the administration to an NCA.

A.5 ISAF RULES
A.5.1 These class rules shall be read in conjunction with the ERS.
A.5.2 Except where used in headings, when a term is printed in “bold” the definition in the ERS applies and when a term is printed in “italics” the definition in the RRS applies.

A.6 CHAMPIONSHIP RULES
A.6.1 The Class Championship Rules shall apply at World and Continental Championships.

A.7 SAILING INSTRUCTIONS
A.7.1 These class rules shall not be varied by sailing instructions except as provided by A.7.2.
A.7.2 At World or Continental Championships the sailing instructions may vary these class rules only with the agreement of the ICA.

A.8 CLASS RULES AMENDMENTS
A.8.1 Amendments to these class rules shall be proposed by the ICA, or a DM, and require to be approved by the ISAF–RSD.

A.9 CLASS RULES INTERPRETATIONS
A.9.1 GENERAL
Interpretation of class rules, except as provided by A.9.2, shall be made in accordance with the ISAF–RSD Regulations.
A.9.2 AT AN EVENT
Any interpretation of class rules required at an event may be made by an international jury constituted in accordance with the RRS. Such interpretation shall only be valid during the event and the organising authority shall, as soon as practical after the event, inform the ISAF–RSD, the DM and the ICA.

A.10 HULL REGISTRATION NUMBER
A.10.1 Registration numbers shall be issued by the certification authority.
A.10.2 Registration numbers shall be issued in consecutive order starting at “1”.

A.10.3 Each hull shall have a unique registration number which shall include the national letters and the certification authority’s sequential registration number. Under no circumstances may a registration number be used on a hull other than the hull on which it was first used.

A.11 CERTIFICATION

A.11.1 For a hull not previously certified, all items required by the measurement form(s) to be measured shall be measured by an official measurer and the details entered onto the form(s).

A.11.2 The measurement form(s), and certification fee if required, shall be sent to the certification authority in the country where the hull is to be registered within 4 weeks after completion of measurement.

A.11.3 Upon receipt of a satisfactorily completed measurement form(s) and certification fee if required within the 4 week time limit, the certification authority may issue a certificate.

A.11.4 The certification authority shall retain the original measurement form(s), which shall be transferred to the new certification authority upon request if the hull is exported.

A.11.5 The dimensions of no more than three rig/sail groups shall be recorded on the certificate. The “A” dimensions of rig/sail groups A, B and C recorded on the certificate shall be in descending order.

A.12 VALIDITY OF CERTIFICATE

A.12.1 A certificate becomes invalid upon:
   (a) a change of ownership,
   (b) withdrawal by the certification authority,
   (c) the issue of another certificate.

A.13 COMPLIANCE WITH CLASS RULES

A.13.1 A boat ceases to comply with the class rules upon:
   (a) use of equipment that does not comply with limitations in the class rules,
   (b) use of equipment that does not comply, or that causes the boat not to comply, with limitations recorded on the certificate,
   (c) alteration or repair of equipment required by the measurement form(s) to be measured, except where permitted by the class rules,
   (d) a change of class rules that causes equipment in use to cease to be permitted, except where the equipment may comply with the class rules in force at the time of its initial fundamental measurement.
A.14 RE-CERTIFICATION

A.14.1 A **hull** may be issued with a new **certificate**, showing dates of initial and new **fundamental measurement** as applicable:

(a) **WHEN A CERTIFICATE BECOMES INVALID UPON CHANGE OF OWNERSHIP**

and the new owner applies to the **certification authority** in the country where the **hull** is to be registered. The application shall include the old **certificate** and re-**certification** fee if required. In the case of an imported **hull** the **certification authority** shall request the measurement form(s) from the previous **certification authority** and a new hull registration number shall be issued,

(b) **WHEN A CERTIFICATE HAS BEEN WITHDRAWN, OR WHEN THE CERTIFICATE AND MEASUREMENT FORM(S) CANNOT BE LOCATED**

and **fundamental measurement** as required for initial **certification** has been undertaken.

A.14.2 A **boat** that has ceased to comply with the **class rules** may be brought into compliance:

(a) **WHEN THE LIMITATIONS AFFECTING THE EQUIPMENT ARE IN THE CLASS RULES**

by carrying out **fundamental measurement** of affected equipment,

(b) **WHEN THE LIMITATIONS AFFECTING THE EQUIPMENT ARE ON THE CERTIFICATE**

by carrying out **fundamental measurement** of affected equipment as required for initial **certification**.

Section B – Boat Eligibility

To be eligible to take part in **racing**, the rules in this section shall be complied with.

B.1 CERTIFICATE

B.1.1 The **hull** shall have a valid **certificate**.

B.1.2 A certificate issued prior to the effective date of these **class rules** remains valid until any of the criteria in A.12.1 is met.

B.2 CLASS ASSOCIATION STICKER

B.2.1 A valid class association sticker, if required by the NCA or the ICA, shall be affixed to the **hull** in a conspicuous position.
PART II – REQUIREMENTS AND LIMITATIONS

The crew and the boat shall comply with the rules in Part II when racing. Measurement to check conformity with rules of Section C is not part of fundamental measurement.

The rules in Part II are open class rules. Measurement shall be carried out in accordance with the ERS except where varied in this Part.

Section C – Conditions for Racing

C.1 GENERAL

C.1.1 RULES

The following ERS rules shall not apply: B.7.1 Mainsail, Foresail and Mizzen Booms set on a Mast and B.7.2 Headsail Booms

C.2 CREW

C.2.1 LIMITATIONS

The crew shall consist of one person.

C.3 ADVERTISING

C.3.1 LIMITATIONS

The boat shall display only such advertising as permitted by the ISAF Advertising Code, Category C.

C.4 HULL

C.4.1 IDENTIFICATION

The hull registration number shall be displayed on the external surface of the hull clearly and legibly with a minimum height of 20 mm.

C.5 HULL APPENDAGES

C.5.1 LIMITATIONS

The same hull appendages shall be used during an event except when a hull appendage has been lost or damaged beyond repair. Such replacement may be made only with the approval of the race committee who shall then remove or cancel any equipment limitation mark attached to the replaced hull appendage.

C.5.2 DEPTH RESTRICTION

The depth restriction gauge, when oriented transversely as in figure H.1, shall be capable of being passed under the hull appendages without either of the two upper corners of the gauge losing contact with the hull.
C.5.3 USE
(a) The hull appendages containing or forming concentrated ballast shall not be moved or rotated relative to the hull.
(b) The hull appendages shall not be attached to the hull more than 15 mm from the hull centreplane.
(c) The hull appendages shall not project fore or aft of the hull shell and deck in relation to the datum waterplane described in figure H.2.

C.6 RIG

C.6.1 LIMITATIONS
Not more than six rigs shall be used during an event. A spar lost or damaged beyond repair may be replaced only with the approval of the race committee who shall then remove or cancel any equipment limitation mark attached to the replaced spar. The race committee may attach equipment limitation marks to spars before the first race of an event.

C.6.2 USE
The rig shall not project fore or aft of the hull shell and deck in relation to the datum waterplane described in figure H.2.

C.6.3 DIMENSIONS

C.7 SAILS

C.7.1 LIMITATIONS
(a) Not more than six mainsails and six headsails, with a maximum of three mainsails and three headsails from any rig/sail group, shall be used during an event except as in (b). The race committee may attach equipment limitation marks to sails before the first race of an event.
(b) When a sail has been lost or damaged beyond repair it may be replaced only with the approval of the race committee who shall then remove or cancel any equipment limitation mark attached to a replaced sail.
(c) A sail of one rig/sail group shall not be used with a sail from another unless it is marked with the appropriate rig/sail group letter and it complies with C.7.2.

C.7.2 DIMENSIONS
The dimensions of the sails in each rig/sail group shall not exceed those on the certificate.
C.7.3 IDENTIFICATION
(a) Identification shall comply with the RRS.
(b) The class insignia shall be the letter “M” of dimensions: height and width 25–30 mm, thickness 6–8 mm and shall be displayed on the mainsail above a straight line between the three-quarter leech point and the nearest point on the luff.

C.7.4 USE
(a) When an upper limit mark is required, the head point of the mainsail shall not be set above the upper limit mark.
(b) The foot of a mainsail, extended as necessary, shall intersect the mast spar above the lower limit mark.
(c) When a forestay limit mark is required, a line taken through the tack point and head point of the headsail shall cut the forward face of the mast spar lower than the lower edge of the forestay limit mark when the headsail clew point is on the hull centreplane.
(d) When a sail has a luff bolt rope or spar sliders they shall be set in a track in the spar.

C.8 REMOTE CONTROL EQUIPMENT
C.8.1 USE
Except for control unit positioning information, no radio transmissions from the boat shall be used.

Section D – Hull

D.1 GENERAL

D.1.1 RULES
The hull shall either comply with the class rules in force at the time of its initial fundamental measurement or comply with the current class rules.

D.1.2 CERTIFICATION
See rule A.11.

D.1.3 BUILDERS
No licence is required.

D.1.4 IDENTIFICATION
The hull registration number shall be marked in an easily visible location on a non-removable part of the hull by any of the following means: painting on, engraving in, bonding in, moulding in.
D.2 HULL

D.2.1 DECK LIMIT MARKS

A deck limit mark for each rig/sail group, A, B and C recorded on the certificate, shall be displayed on the hull centreplane near to the relevant mast position. Each shall be a minimum of 5 mm in diameter.

D.2.2 MATERIALS

Except in remote control equipment, the density of material shall not exceed that of lead (11,300 kg/m³).

D.2.3 CONSTRUCTION

(a) The hull shall be a monohull.

(b) Except for the trunking for hull appendages, the hull shall not have:

(1) voids in the waterplane and/or the underwater profile,

(2) hollows in the plan view and/or the underwater profile that exceed 3 mm,

(3) transverse hollows in the undersurface of the hull that exceed 3 mm when tested parallel to the waterplane as in figure H.3.

(c) The forward 13 mm shall be of elastomeric material.

D.2.4 DIMENSIONS

<table>
<thead>
<tr>
<th>Hull length in relation to the datum waterplane described in figure H.2</th>
<th>minimum</th>
<th>maximum</th>
</tr>
</thead>
<tbody>
<tr>
<td>1275 mm</td>
<td>1290 mm</td>
<td></td>
</tr>
</tbody>
</table>

D.2.5 FITTINGS

Fittings shall not project outboard of the hull shell and deck in relation to the waterplane described in figure H.2.

Section E – Hull Appendages

E.1 GENERAL

E.1.1 RULES

(a) Measurement shall be carried out in accordance with the ERS except where varied in these class rules.

(b) Hull appendages shall comply with the current class rules.

E.1.2 BUILDERS

No licence is required.

E.2 HULL APPENDAGES

E.2.1 MATERIALS

Materials shall not be of density higher than lead (11,300 kg/m³).
E.2.2 CONSTRUCTION

Hull appendages shall not be:
(a) articulated,
(b) retractable.

Section F – Rig

F.1 PARTS

F.1.1 A rig shall consist of no more than:
(a) one mast,
(b) one headsail luff spar,
(c) four booms,
(d) standing rigging,
(e) running rigging,
(f) fittings.

F.2 GENERAL

F.2.1 RULES

Rigs shall comply with the current class rules.

F.2.2 MANUFACTURERS

No licence is required.

F.2.3 CONSTRUCTION

(a) A fitting attached to a rotating spar shall be no bigger than is reasonably required for its purpose.
(b) Fittings faired into a spar shall be considered to be part of the spar.

F.3 MAST

F.3.1 MEASUREMENT

The mast spar cross section shall be taken to include: fairings, extensions, articulated flaps. Movable parts shall be set to give the greatest dimension.

F.3.2 CONSTRUCTION

Three limit marks shall be placed on each mast spar, as in H.6, except that:
(a) the upper limit mark may be omitted where the rig construction makes it impossible to exceed the “A” measurement recorded on the certificate.
(b) the forestay limit mark may be omitted where the rig construction makes it impossible to exceed the “I” measurement recorded on the certificate.
F.3.3 DIMENSIONS
See F.3.1 Measurement.

<table>
<thead>

Section G – Sails

G.1 PARTS
G.1.1 The sail plan is restricted to no more than:
(a) one mainsail,
(b) one headsail.

G.2 GENERAL
G.2.1 RULES
Sails shall comply with the class rules in force at the time of their initial fundamental measurement.
G.2.2 CERTIFICATION
The official measurer shall certify sails at the tack and shall date each with the date of fundamental measurement.

G.2.3 SAILMAKERS
No licence is required.

G.2.4 DEFINITIONS

Batten Pocket Point
The batten pocket point is defined as the intersection of the extended centreline of the batten pocket, or batten if there is no batten pocket, and the leech.

G.2.5 MEASUREMENT
(a) During measurement:
   (1) battens need not be removed.
   (2) sails may be attached to spars.
   (3) forestays inside headsail luff tabling need not be removed.
(b) The luff perpendicular, quarter width, half width and three-quarter width shall be taken:
   (1) on a double luff sail with supporting spar or stay in place: to the luff, or to fore edge of spar, whichever gives the greater dimension,
   (2) on a sail attached to spar section fairings, extensions and/or articulated flaps: to their foremost edges,
   (3) on a sail with the luff set in a track in a spar: to the aft edge of the spar,
   (4) on other sails:
       to the luff. Discontinuous attachments on the luff shall be disregarded provided their total length measured along the luff does not exceed 10% of the luff length and the longest attachment is no more than twice the shortest.
(c) The upper and lower leech profile is controlled as shown in H.5.
(d) Parts of stiffening which are less than 2 mm in diameter and not covered by sail material shall not be taken as parts of the sail.

G.2.6 CONSTRUCTION
(a) The construction shall be: soft sail.
(b) Stiffening is only permitted:
   (1) For battens
   (2) At the head.
(c) Sails shall be marked at the clew with their rig/sail group letter, or letters if the sail is to be used with more than one rig/sail group.
G.2.7 DIMENSIONS

minimum maximum

Top width
- on a double luff sail ................................................................. 40 mm
- on a sail with luff rope or sliders ............................................ 25 mm
- on other sails ........................................................................... 20 mm

Extension of stiffening at head from a point 20 mm forward of aft head point at a line through aft head point and head point .......................................................... 20 mm

Foot round taken from foot to a straight line between tack point and clew point ......................................................... 25 mm

Foot irregularity ................................................................................. 3 mm

Batten length ........................................................................................... 105 mm
Batten width ............................................................................................. 20 mm

Variation in the following measurements:
- between batten pocket point and adjacent batten pocket point(s),
- between clew point to adjacent batten pocket point,
- between head point to adjacent batten pocket point ......................... 25 mm

G.3 MAINSAILS

G.3.1 CONSTRUCTION
There shall be no more than four battens which shall be in the leech.

G.4 HEADSAILS

G.4.1 CONSTRUCTION
There shall be no more than three battens which shall be in the leech.

G.5 SAIL AREA

G.5.1 LIMITATION
The measured sail area of each rig/sail group shall not exceed 0.5161 m².

G.5.2 CALCULATION
The measured sail area of a rig/sail group is taken as the sum of the following areas for that rig/sail group:
- mainsail area A × B / 2
- excess mainsail area A × (2X + Y + 2Z) / 6
- headsail area Q × R / 2
- excess headsail area Q × (2x + y + 2z) / 6

where for that rig/sail group:
- A, B, Q and R are the largest dimensions and
- X, x are the largest excesses in the quarter widths and
- Y, y are the largest excesses in the half widths and
- Z, z are the largest excesses in the three-quarter widths as in Fig H.6.
PART III – APPENDICES

The rules in Part III are **open class rules**. Measurement shall be carried out in accordance with the ERS except where varied in this Part.

Section H – Figures

**H.1 DEPTH RESTRICTION GAUGE**

**H.2 DATUM WATERPLANE**
H.3 TRANSVERSE HULL HOLLOW

H.4 COMBINED BOOM SPAR CROSS SECTION

The largest minimum combined boom spar cross section over the length of the junction is found in this section and it shall not exceed 40 mm.
H.5 CONTROL OF THE UPPER AND LOWER LEECH PROFILE

THE TEMPLATE
A template of 900 mm radius shall be used for this measurement.

AT THE HEAD
The template shall be placed to touch the aft head point and a straight line through the two nearest leech points.

AT THE CLEW
The template shall be placed to touch the clew point and a straight line through the two nearest leech points.

GENERAL
If a leech point (figure a) and/or a batten pocket point (figure b) falls outside the template when positioned as above, the template shall be re-positioned to either point so that neither point appears outside the template.

LEECH PROFILE
No part of the leech profile shall fall aft of the aft edge of the template.
H.6  SAIL AREA MEASUREMENT

H.7  TOP WIDTH AND STIFFENING AT HEAD

Double luff sail  Sail with luff rope or sliders  Other sails
